

STRATEGIES ELEVATING YOUR BUSINESS POSTURE

Zen Strategics is an emerging markets management consulting firm that offers a unique, innovative, and analytical approach to the crucial & current challenges faced by government agencies in the realm of cyber, data, help desk, and cloud security. Our approach to delivering leading edge enterprise security solutions is to use continuous monitoring & automation, in effectively & efficiently migrating the legacy, "point-in-time bolt on" enterprise security risk to a "near real-time" risk management and situational awareness. Our consultants are certified IT security experts (CISSP, CISA, CISM, Security+, CEH, GIAC) with experience in leveraging standardized methodologies and tools to secure the enterprise.

We have the certifications to make sure our clients' IT plans address critical security risks & vulnerabilities, continuity of operations, and business impact requirements.

CORE CAPABILITIES

Zen Strategics specializes in the areas of Cybersecurity, Cloud, and Big Data, and we have helped drive the success of major Government agencies and IT transformation programs.

Cyber Security Services

- > Security Operations (SOAR & Splunk Automation)
- > Cyber Advisory
- > Security Compliance & RMF Services
- > Continuous Monitoring (CDM)
- > Network Security/Risk & Vulnerability Management

Data & Information Management

- > Information & Records Management
- > Controlled Unclassified Information Programs Support
- > Enterprise Architecture
- > Business Intelligence
- > Data Science

Cloud & Infrastructure

- > Cloud Computing Strategies
- > 3PAO Assessments
- > Data Infrastructure

Management Consulting

- > Strategy & Implementation
- > Project Management Support
- > Enterprise Risk Management
- > Lean Six Sigma (LSS) Consultation
- > Workflow Standardization

OUR CLIENTS

518210ERM - Electronics Records Management Solutions

NAICS: 541511, 541512, 541513, 541519, 541611, 541618, 541690, 518210, 541330, 641430

PROVEN PAST PERFORMANCE

Trusted Advisors for your Secure Enterprise, Cloud Infrastructure & Data Management needs

Zen Strategics diverse clients are decision-makers and technologists, program managers, executives, policymakers, and budget officers seeking tangible benefits for developing, delivering, and managing technology-based solutions that enable and sustain their operational excellence. We understand the compelling forces to fulfill government mandates and achieve mission success, as well as the discipline needed to make it happen under time and budget constraints, serving as a trusted advisor to the clients.

EO 13556 implementation support to stand-up a CUI PMO & Marking Automation

Controlled Unclassified Information PMO (NIST 800-171 & CMMC compliance) Department of Education As the Prime Contractor leading the effort encompassing management, planning, implementation, and administrative support for the Department's Controlled Unclassified Information (CUI) & Information Management Program. The key services sought include:

- > Planning and implementing a Department-Wide CUI Program with help desk & contact center support services feature Ensuring all departmental CUI practices are consistent with law, regulation, or government-wide policy
- > Developing internal mechanism to promote consistent CUI related practices & also supporting the department Records Management needs
- > Ensuring ED personnel are properly trained in practices related to CUI & responding to general email inbox inquiries

CIO Cloud Engineering and Microsoft Azure Support

As a major subcontractor providing support to SBA OCIO via Cloud and infrastructure architecture engineering, cybersecurity architecture and engineering, mobility engineering, and operational support services. Primarily supporting activities for SBA's datacenter to Azure cloud migration. Also provided ISSO support to SBA CISO shop, resulting in improved FISMA scores & reduced POAMs.

CISO Handbook Support & Security Operations as a Service (SOCaaS) Research

As a subcontractor and lead cyber subject matter expert, led the effort in collaboration with OMB/GSA to architect the one and only CISO handbook that serves as guidance for executive personnel stepping into the Federal Agency Cyber Security role. It can be downloaded here: www.cio.gov/ciso-handbook. Currently supporting cybersecurity operations modernization planning research initiative for GSA/OMB.

Continuous Monitoring

Managed & led the strategic evolution of FISMA security metrics (CIO) and architected the Continuous Diagnostics and Mitigation (CDM) initiative, for DHS NPPD that has a direct impact on cybersecurity for agencies & enterprises mandated to implement it. Effort includes collaborating with federal civilian agencies to assess cyber capability performance, compiling metrics, reviewing cyber products, conducting analytics for agency cybersecurity posture assessments, and supporting metrics review process via Cyberscope and Cyberstat.

A&A and ISSO as a Service with CSAM expertise

We provided/are providing security engineering support for the security controls assessments (SCA) services, oversight of the entire SCA project, the project management, development of documentation, and scheduling of tasks for General Support Systems (GSS). We also helped develop System Security Plan (SSP) & resolved Plan of Action & Milestones (POAM&S). Some of the agencies leverage Agile Devops Methodology & need security assessments aligning with the sprint cycle. This is where they leverage the ISSO as a service model.

Cybersecurity Operations Support

Zen was recently awarded a 5 year \$57MM award contract to provide the following:

Security Operations Center

- > FSA Support (Tier II & III)
- > Incident Management
- > Advanced Analysis Group
- > Threat Management Group

SOC Engineering Support

- > Operations and Maintenance
- > Subject Matter Expertise / Engineering
- > Continuous Diagnostic Monitoring (CDM)

Architecture Support

- > SOC Architecture Support
- > Enterprise Security Standards, Design Patterns, and Procedures
- > Enterprise Security Architecture Processes and Methodology

Vulnerability Scanning and Penetration Testing

- > Red Team
- > Cyber Hunt Team
- > Web Application Surveillance Program (WASP)
- > Testing and Analysis Services
